Phoenix, AZ 85007

Docket E-00000X-13-
0214

Dear Commissioners,

As an APS customer and a small business owner, it's very important to me that you move forward with the Energy Efficiency standard for APS and other utilities you regulate.

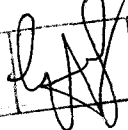

As someone who weighs the pros and cons of important investments for my business, I know how important it is to get the most bang for your buck. Because of this, I'm a fan of energy efficiency. Improving energy efficiency is relatively easy and inexpensive. It can provide energy cheaper than any power generation method available. Also, those investments stay here, in Arizona, rather than going to out-of-state fuel providers.

Sincerely,

Arizona Corporation Commission
